01 | About This Proposal

Our role: to build and manage Ripple's social media presence through strategy, content, creative production, campaign communication, publishing and performance review.

Positioning: This proposal is a Social Media Marketing service proposal—not a quotation for four individual designs. The creatives shown are sample campaign work demonstrating the type of communication and creative direction we can develop for the brand.

Core message

We are not simply designing posts. We are building a complete social media presence for your brand.
